A380 South Devon Link Road Motorists' Update

Welcome to a special monthly bulletin update containing three articles which may help with travel arrangements.

New road layout at Aller Cross to open

Next week the two new small roundabouts at Aller Cross will go live and take local traffic beneath the new Aller Cross Underbridge - a structure which will eventually carry the new A380 South Devon Link Road.

The new arrangements will replace the present junction between Aller Road, Old Newton Road and Kingskerswell Road, and incorporate a new side road for local access only.

This weekend Aller Road, Old Newton Road and Kingskerswell Road will be closed near Aller Cross from 7pm on Friday, 21st November until 7am on Monday 24th November to allow work to proceed.

The new road layout will greatly improve the movement of traffic and increase safety in the area, and allow contractors for Galliford Try to continue their work away from the public highway.

The new roundabout arrangement is scheduled to open the week commencing 24th November. The final works are weather-dependent so in the event of poor weather this may be revised.

To assist you with the new layout refer to the map overleaf. To view a version which can be enlarged please click [here](#)

Penn Inn Flyover final beams installation

This Friday, 21st November we will be installing the final bridge beams (three braced pairs) across the south section of the Penn Inn Roundabout. Between 7.30pm and 6am the following traffic management measures will be in place:

- At 7.30pm the northbound approach to Penn Inn will be reduced to one lane of traffic
- At 9pm the A380 southbound lane will be closed between Wear Barton and Penn Inn. All southbound traffic will be diverted through Newton Abbot via Kingsteignton. Light vehicles travelling from Shaldon Road towards Newton Abbot / Exeter will be able to use a temporary U-turn facility on the A380 adjacent to Addison Road. HGVs from Shaldon Road will not be able to negotiate this U-turn and will continue to the Romany Jones lay-by, carry out a U-turn and return north
- A380 northbound approach traffic will be held by temporary traffic signals for brief periods before Penn Inn while the beams are being lifted

The beams lift is highly weather-dependent and may be postponed if weather conditions are too severe. Please refer to the website www.southdevonlinkroad.co.uk for the latest updates.

St Marychurch Road weekend closure

As part of the construction of the new junction at the top of Aller Brake Road, contractors for Galliford Try will be temporarily closing a section of St Marychurch Road this weekend.

This will be in the vicinity of Twickenham Road, and traffic will be diverted through Milber. Road signs have already been positioned to advise road users of this temporary diversion.

The road will be closed from 7pm on Friday 21st November through to 7pm on Sunday 23rd November. Once again these works are dependent on good weather.

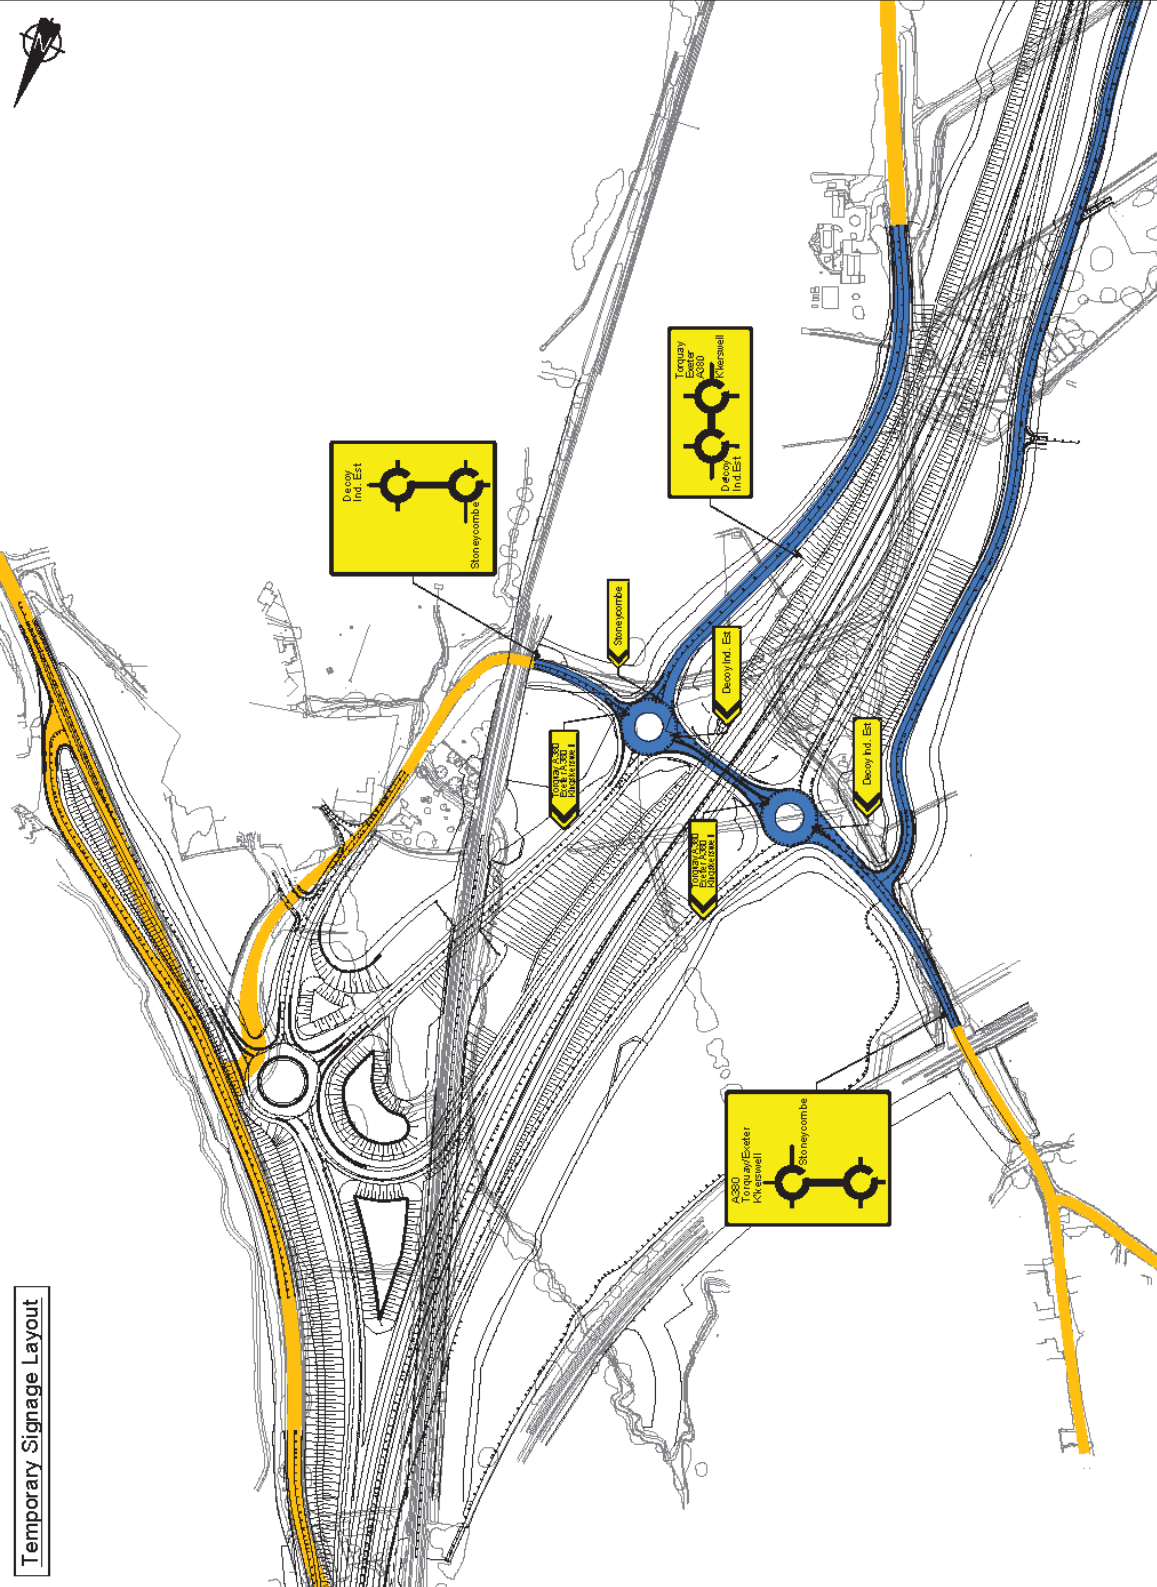

Further information about the South Devon Link Road can be found on our website www.southdevonlinkroad.co.uk The Galliford Try public liaison team Tracey Waygood and Patrick Beasley can be contacted on 01626 357729 or 01626 233019 or by email at: A380.SDLR@gallifordtry.co.uk
